IMPORTANT INFORMATION REGARDING

Recall of Sodium Chloride Injection by Baxter

Effective Date: 10/23/2017

Baxter

Recall of Sodium Chloride Injection

On October 23, 2017, Baxter announced a voluntary recall of one lot of Sodium Chloride 0.9% Injection because of reports of individual bags being adhered together. Tears occurred when the bags were pulled apart, which may lead to a leak and compromise sterility of the product.

Per Baxter, a leak of the solution bag may cause a delay or interruption of therapy, under-delivery, unintended drug exposure, and microbial contamination. If not detected, the use of a solution bag with a leak could lead to a bloodstream infection or other serious adverse events.

OptumRx notified members who may be affected by this recall. These members were advised to contact their pharmacy to find out if their medicine is being recalled and not to use the recalled medicine. In the future, these members may inquire about the Sodium Chloride Injection prescription(s) you dispensed.

If you have any questions, please call Baxter at (800) 437-5176 (8:00 AM – 5:00 PM CST, Monday through Friday) for more information about this recall.
