IMPORTANT INFORMATION REGARDING

Recall of Injectable Antibiotic Products by AuroMedics

Effective Date: May 3, 2018

AuroMedics

Recall of Injectable Antibiotic Products

On May 3, 2018, AuroMedics announced a voluntary recall of some lots of Injectable Antibiotic Products because of particulate matter. Ampicillin/Sulbactam is being recalled due to the presence of red particulates that are believed to be red rubber particles from the manufacturing process of the active ingredients. Piperacillin/Tazobactam is being recalled due to the presence of glass particulates visible only after reconstitution.

Per AuroMedics, infusion of antibiotics with particulates may result in local site reactions or more serious outcomes such as thromboembolic events, which may be life-threatening. Patients with vascular disease may be at particular risk of embolic events which could cause permanent impairment or damage to a body structure or function.

OptumRx notified members who may be affected by this recall. These members were provided information to help them identify if their medicine is being recalled and advised not to use the recalled medicine. In the future, these members may inquire about the Ampicillin/Sulbactam and/or Piperacillin/Tazobactam injection products prescription(s) you dispensed.

If you have any questions, please call AuroMedics at (888) 238-7880 (8:30 AM – 4:30 PM EST, Monday through Friday) for more information about this recall.

### Ampicillin/Sulbactam and Piperacillin/Tazobactam Injection Products Recalled by AuroMedics

<table>
<thead>
<tr>
<th>Product Description</th>
<th>NDC #</th>
<th>Lot # (expiration date)</th>
</tr>
